

The Problem

 **Workouts are too long** — Existing fitness apps demand 45–60 min sessions that busy professionals simply cannot fit into their day.

 **Interfaces are too loud & gamified** — Apps feel overwhelming, distracting and childish for a stressed office professional who just wants something calm and simple.

 **Requires a gym they cannot reach** — Most apps assume you have gym access, but this user is stuck at a desk for 8+ hours with no time to travel.

Our Focus — Micro-workouts and desk exercises that fit inside a 5-minute break, designed for the user who cannot leave their desk

User

Arjun Sharma

Age : 31

TIME-POOR PROFESSIONAL

JOB TITLE AND INCOME

Software Engineer · ₹9 LPA

GOALS (WHAT HE WANT)

Reduce Stress

Better posture

More energy

Mental Clarity

FRUSTRATION

No time after work

Gym feels too far

App too complicated

“I really want to get fit but I just don’t have the time or energy after a full day of meeting”

Inside Arjun's Head

SAYS

- "I never have time to go to the gym."
- "I'm too tired after work to exercise."
- "I'll start working out from next week."

THINKS

- "I'm getting unhealthy day by day."
- "My colleagues look fitter than me."
- "I have no discipline or willpower!"

DOES

- Drinks 4 coffees a day to stay awake.
- Skips lunch to finish pending work.
- Sits at desk 8+ hours without moving.

FEELS

- Guilty for not taking care of his health.
- Burnt out and mentally exhausted by 6 PM.
- Physically stiff with back and neck pain.

Key Insights

What we learned from the Empathy Map

- 1 User doesn't need a gym, needs a desk solution.
- 2 5 minute workouts are more realistic than 1 hour.
- 3 App must be calm and clean not gamified.
- 4 Best time to reach user is lunch or morning commute.

Arjun's Typical Day

Why he never finds time to exercise

 9AM — Reaches office stressed.

 1PM — Skips lunch, back pain starts.

 3PM — 4th coffee of the day.

 6PM — Leaves office burnt out.

 11PM — Too tired to exercise.

Conclusion

- ✓ **Scenario Understanding** — We deeply understood the reality of a Time-Poor professional who struggles to find time for fitness.
- ✓ **Human Definition** — We created a specific persona — Arjun Sharma, a 31 year old Software Engineer with real goals and frustrations.
- ✓ **Empathy Mapping** — We mapped what Arjun says, thinks, does and feels — giving us a complete picture before any design begins.

"Now we are ready to design — not for assumptions, but for real human needs."

Thank you
